A rapid and robust, yet truly agile supply chain

Manufacturing is the soul of our company. We were born to produce.

We deliver world-leading products to our customers by putting them at the centre of our daily work.

And by endeavouring to truly understand your needs in order to provide an exceptional service.

Speed

We strive to deliver you the best-in-class. Fast.

- Swift identification of your exact needs, supported by on-time delivery of tailored high-quality products and solutions, backed up by the guarantee of prompt management of any critical situations.
- A lean manufacturing chain and large, modern centres of excellence greatly enhance our capacity – on a local and global scale.
- Our stock level rates are strategically monitored to minimise wait times.

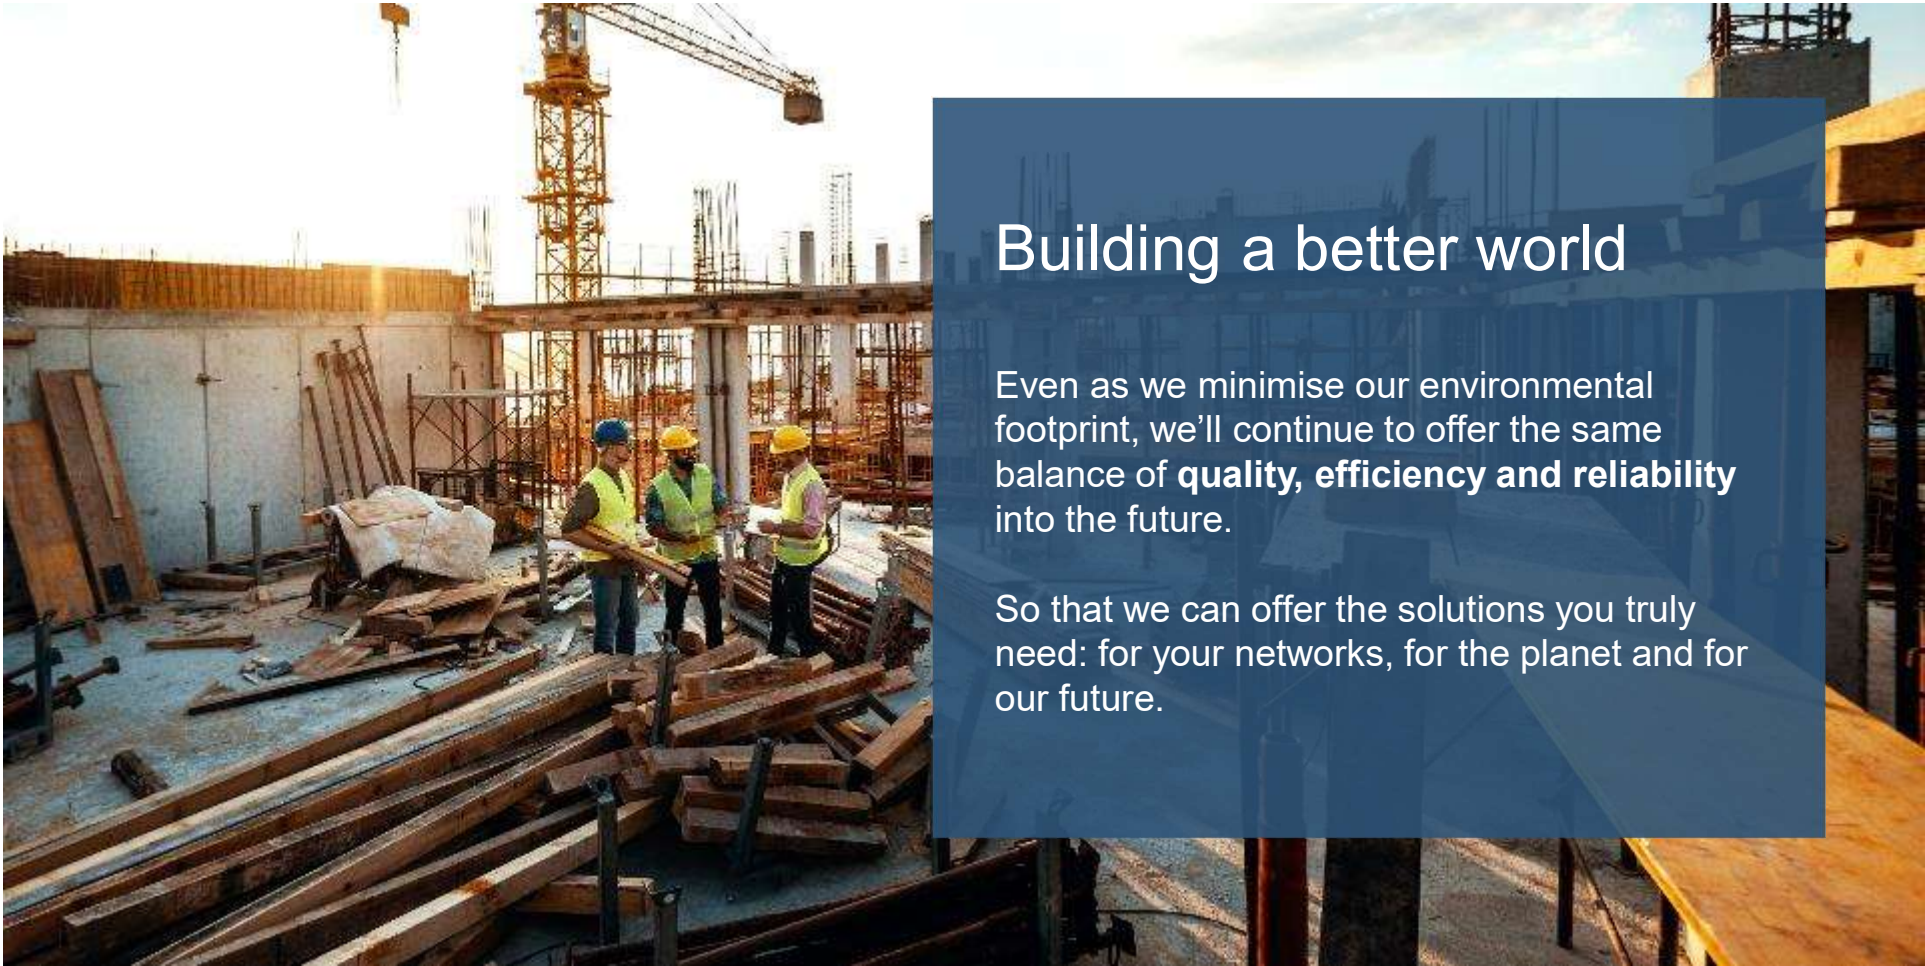

Adaptation

Our supply chain is adaptable too.

- We continually streamline decision-making processes across the board, enabling us to manoeuvre more effectively in response to market demand.
- Our stock policies and planning strategies mean we can respond quickly and efficiently to market fluctuation and changing customer needs.

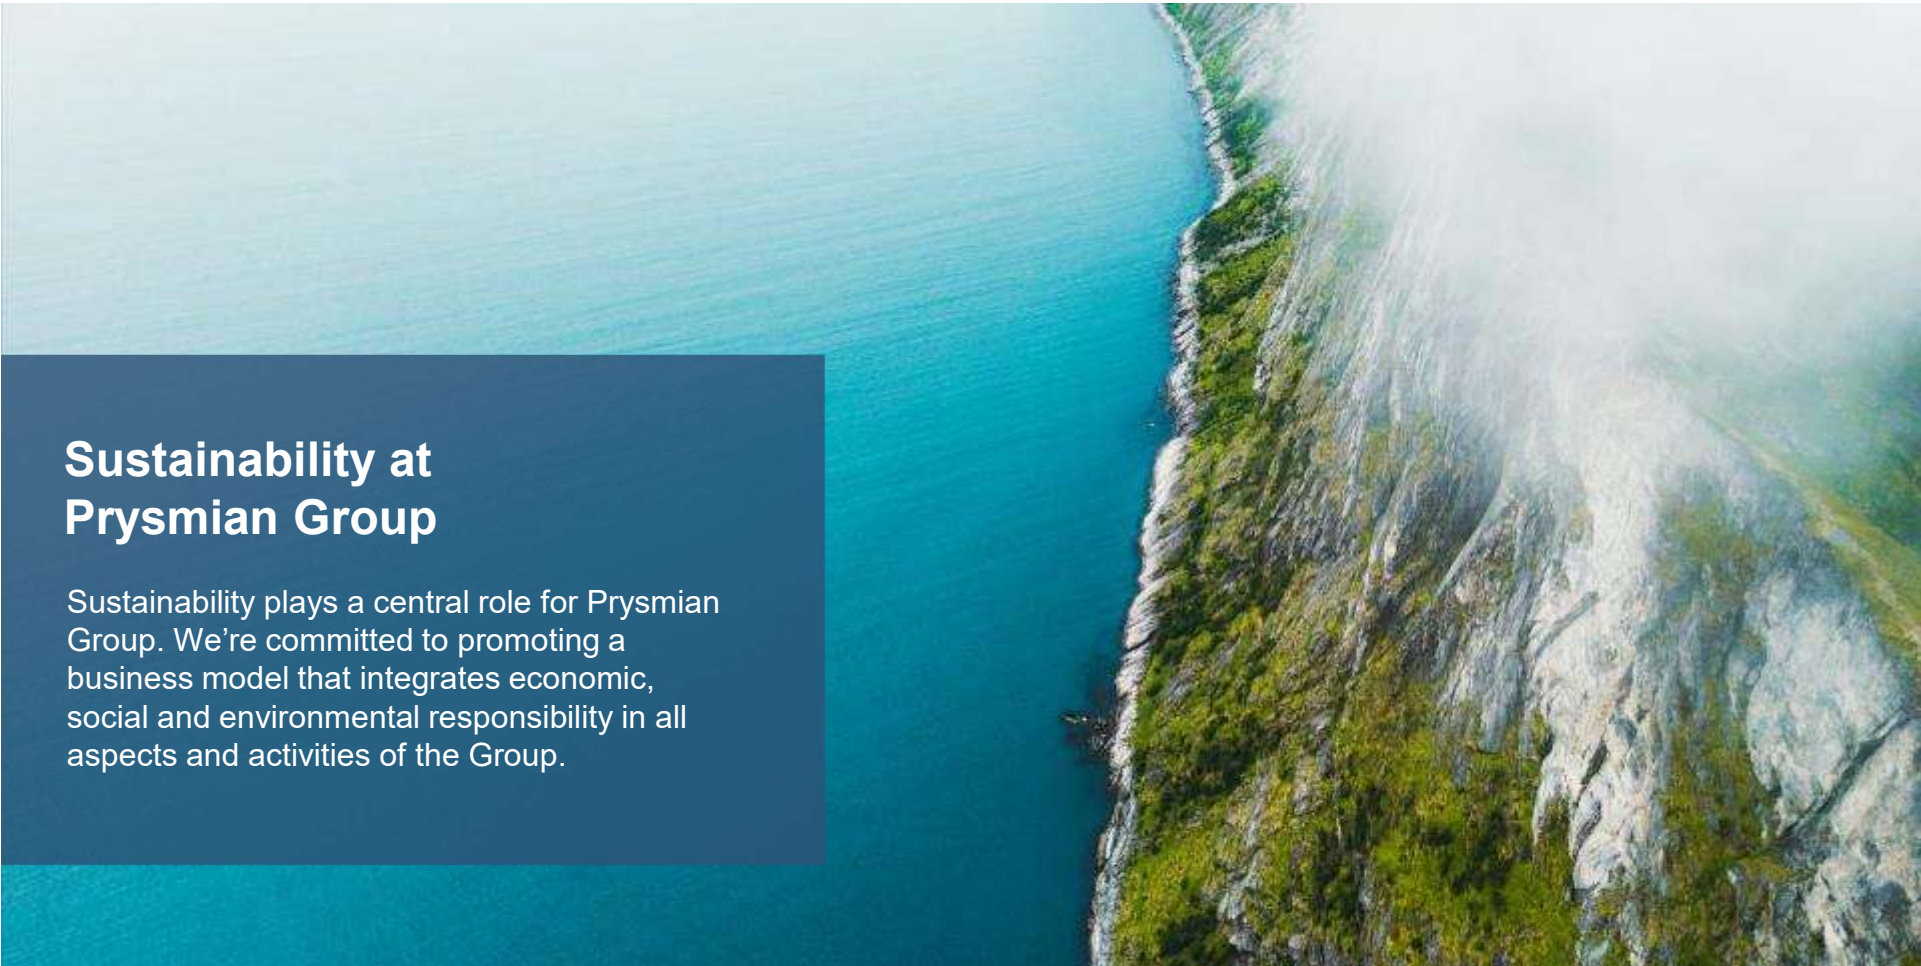

A photograph of a construction site at dusk or dawn. In the foreground, there are large stacks of wooden beams and construction materials. Three workers wearing hard hats and safety vests are standing near the materials, looking at a set of plans. In the background, a large yellow crane is visible against a sky with some clouds. The overall scene is one of active construction.

Building a better world

Even as we minimise our environmental footprint, we'll continue to offer the same balance of **quality, efficiency and reliability** into the future.

So that we can offer the solutions you truly need: for your networks, for the planet and for our future.

Sustainability at Prysmian Group

Sustainability plays a central role for Prysmian Group. We're committed to promoting a business model that integrates economic, social and environmental responsibility in all aspects and activities of the Group.

PRYSMIAN GROUP RANKS FIRST IN THE DOW JONES SUSTAINABILITY WORLD INDEX

Categories: [Corporate](#) [People](#)

MILAN - 11/13/2021 - 2:35 PM

Milan, 13 November 2021. Prysmian Group, world leader in the energy and telecom cables systems industry, ranks first with 87 points in the EIQ Electrical Components & Equipments on the Dow Jones Sustainability World Index, according to the result of the 2021 annual review conducted by S&P Global CSA. Prysmian is the only pure cable maker included in the most recognized sustainability index at global level, covering over 5,300 companies.

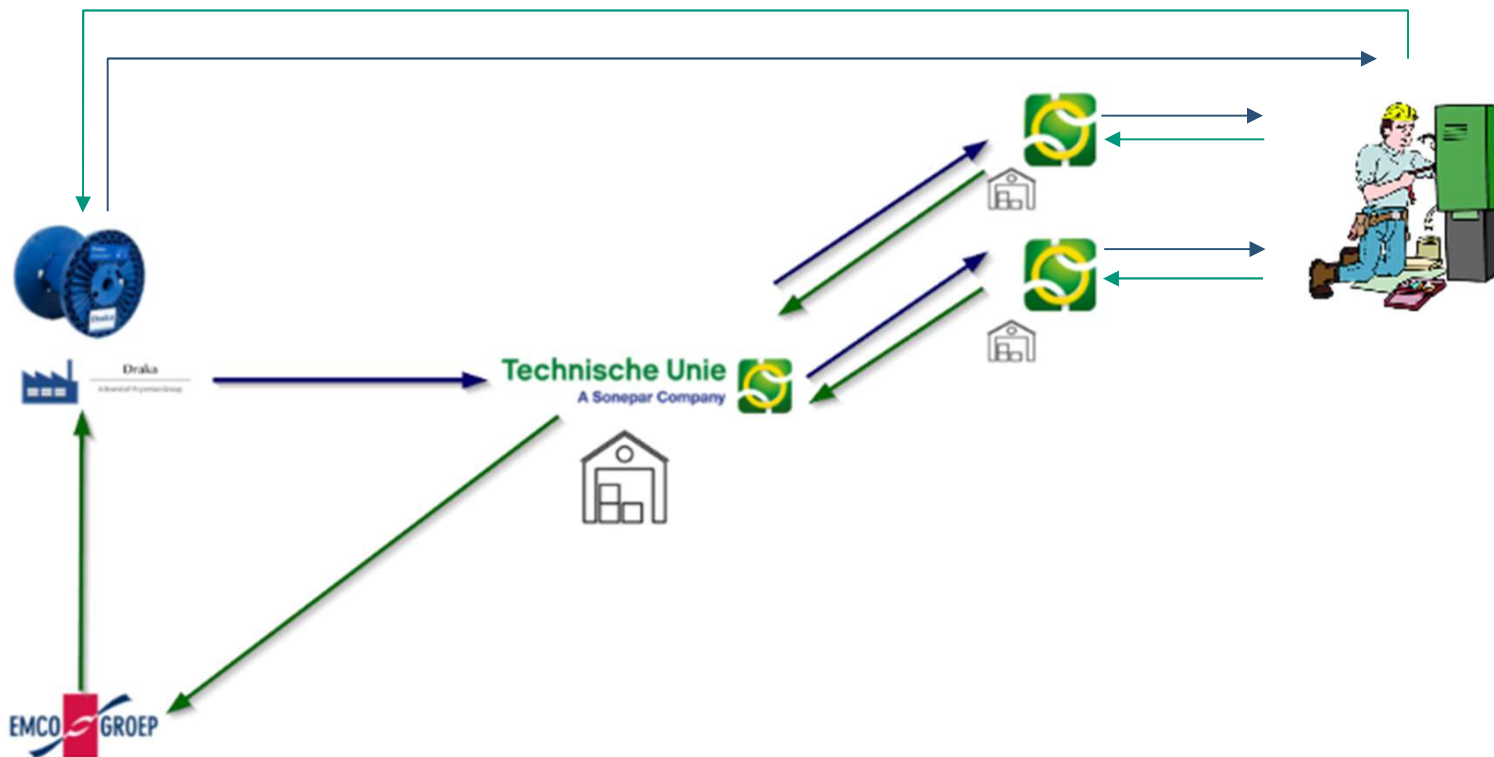

"We are very proud of this important achievement – commented Valerio Battista CEO of Prysmian Group – as it recognizes our commitment in constantly improve the sustainability of our operations, supply chain and organization. Sustainability is also integrated as a fundamental part of our business growth strategy. We are strongly committed to support the transition to renewable energy resources as well as to a digitalized and decarbonized world, by making available the most advanced cables and optical fiber technology for power grids and telecom networks".

Prysmian achieved the best results (100 points) in Innovation Management, Environmental Reporting, Social Reporting, Talent Attraction & Retention, Materiality, Risk & Crisis Management and Occupational Health & Safety.

At Prysmian Group, we strongly believe that Sustainability and Innovation are linked together. We have embarked on a comprehensive innovation effort including product carbon footprint, circular economy and low carbon product innovations for Energy transition and Digitalization.

Return rate less than 1%

Drum return plan 2021/2022

Since non of the Dutch wholesalers had any drum return policy defined in 2020 we will rolled-out a 3-phase plan.

Phase 1: Agreement and activation for adopting a drum return policy together with the Prysmian drum return service.

Goal: by the end of 2021 the amount of empty drum deliveries reduced to a maximum of X%

Phase 2: Further controlling the process by collecting data about the drum return flow. Exclusive pilot with **Technische Unie - Sonepar** via **RTI**.

Goal: determine the return rate and improve the return rate by the end of Q1 2022.

Phase 3: Have a 90% accurate and live overview of the drum flow

Goal: by the end of 2022 a return rate of 10% to Prysmian.

Phase 1

Agreement and activation for adopting a return policy together with the Prysmian drum return service.

Goal: by the end of 2021 the amount of empty drum deliveries reduced to a maximum of X%

Started with the Drum return service:

BLOCKCHAIN

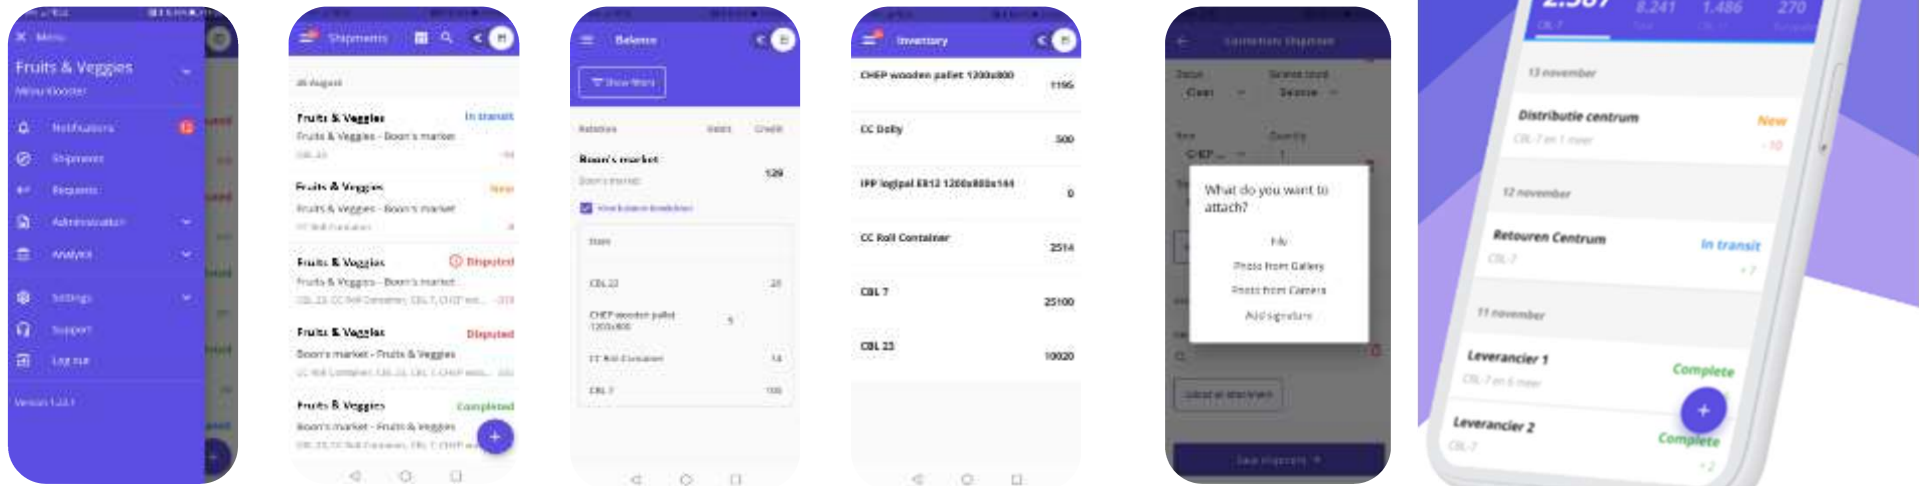

Phase 2

Further controlling the process by collecting data about the drum return flow. Start with pilots with customers.

Goal: determine the return rate at wholesalers and improve the return rate by the end of Q1 2022.

We started a collaboration with RTI Blockchain. Using a blockchain dashboard which could be entirely automatic. They calculate costs of €0,0005 per moving item.

Why controlling the Drum Return Flow?

- + Controlling waste management
- + Improving Life Cycle Assessment
- + Economical benefits

Thank you
