

Transforming Industries using Additive Manufacturing

Maarten van Dijk - Managing Director

7 years actively working on 3D printing
5% of non-standard parts 3D printed in 2022
Over 50,000 pcs per year

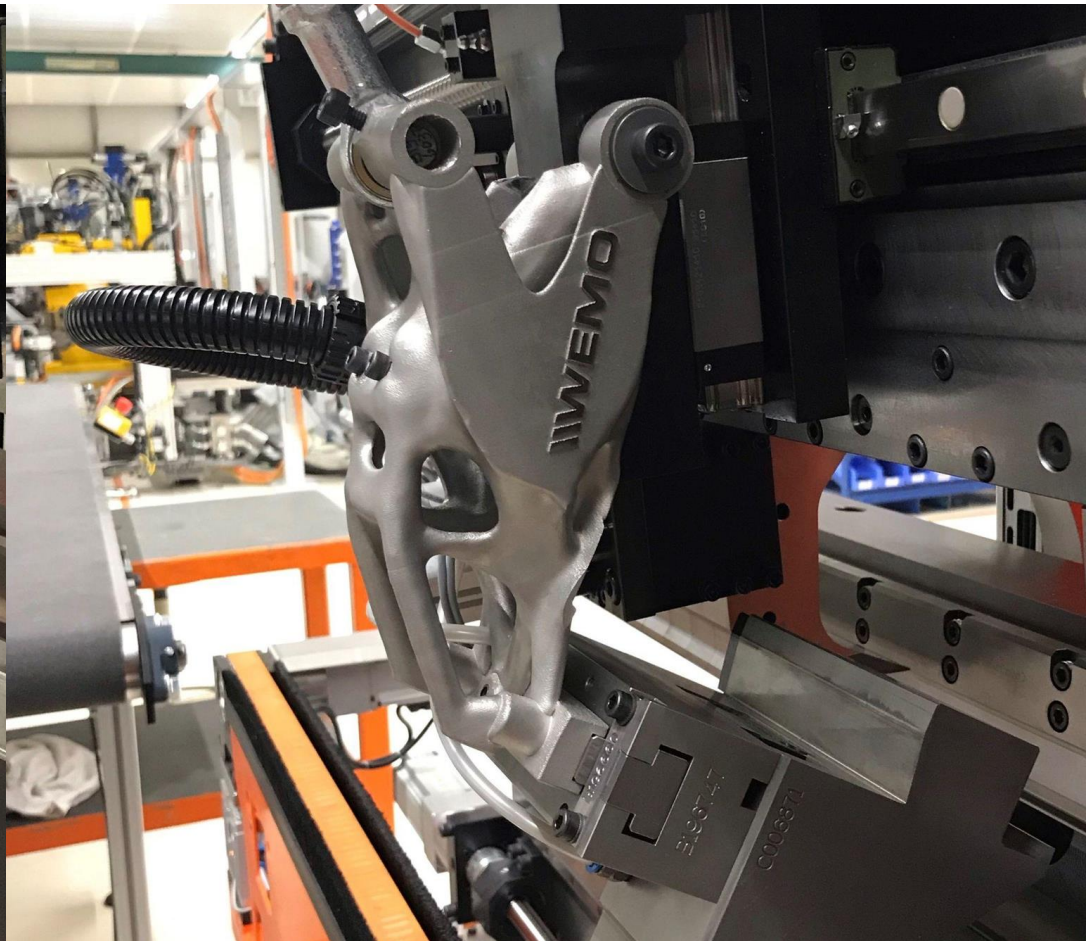

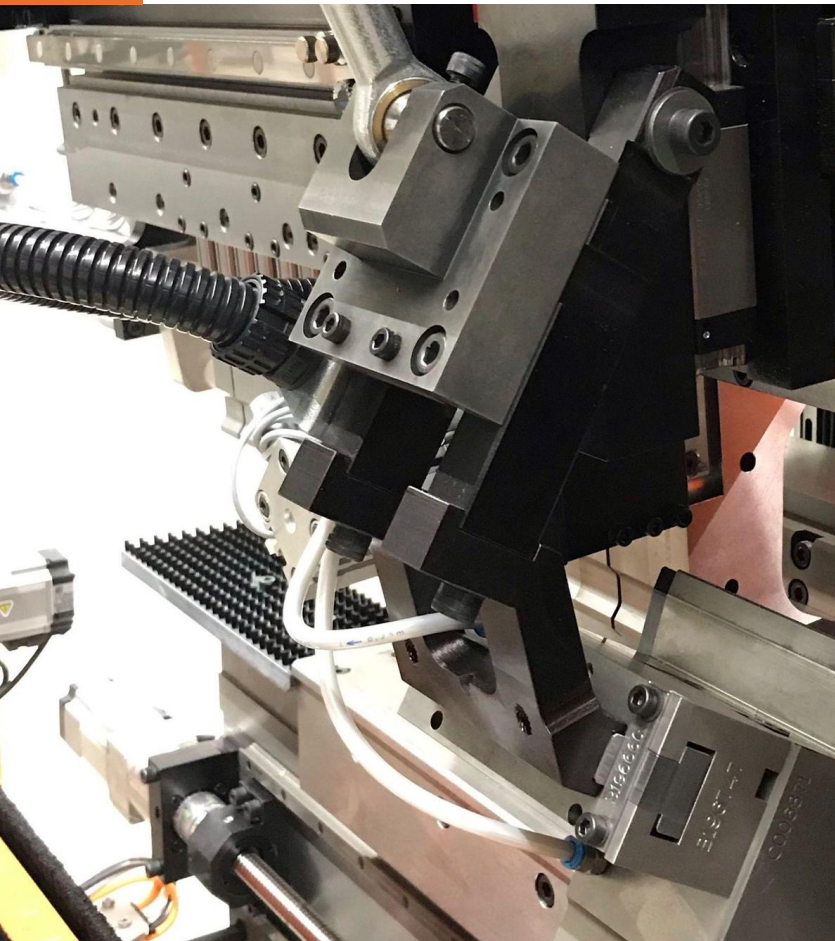

Business transformation

Stainless steel bracket for CNC panel bending line

Customer: WEMO machinery

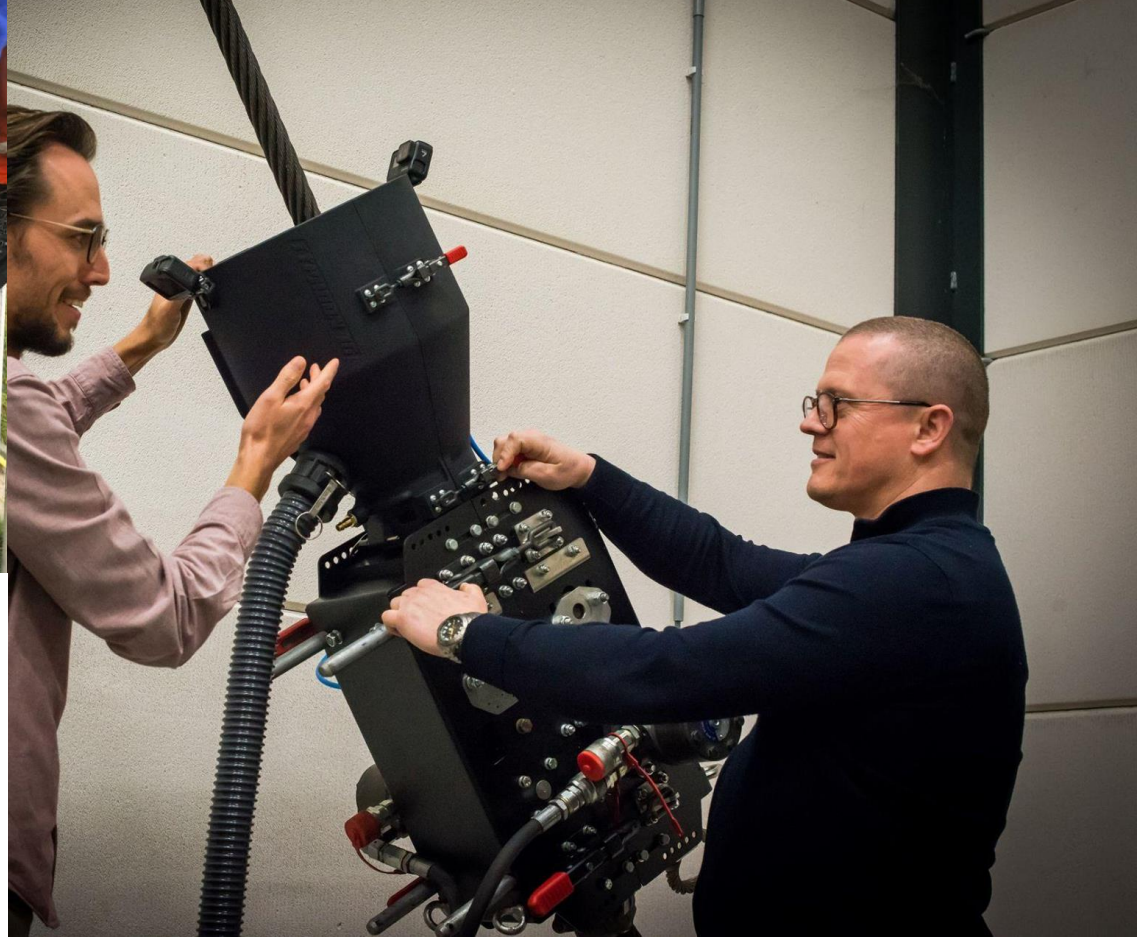

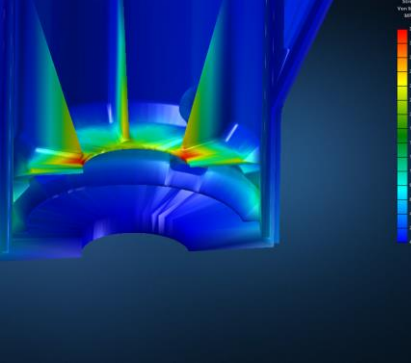

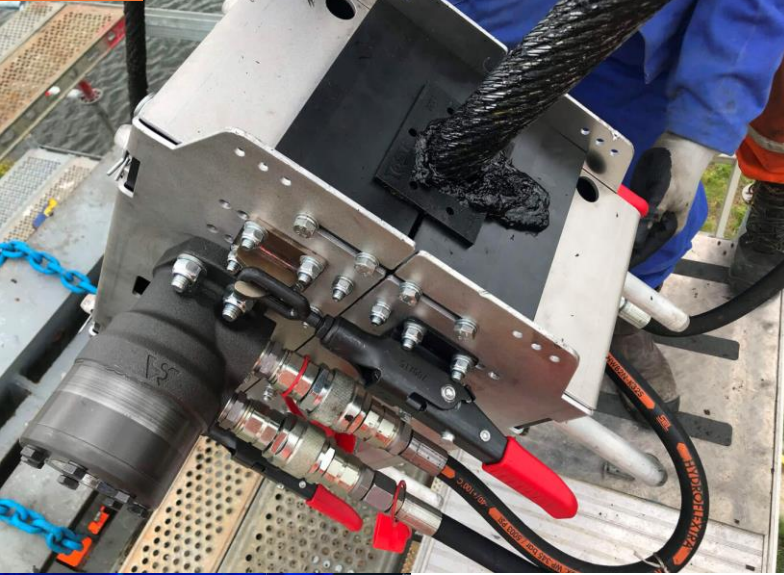

Stainless steel gripper - Food packaging industry

Customer: Sidel - Tetrapak

Industrial polymer - Oil and Gas equipment

Customer: Suprotech

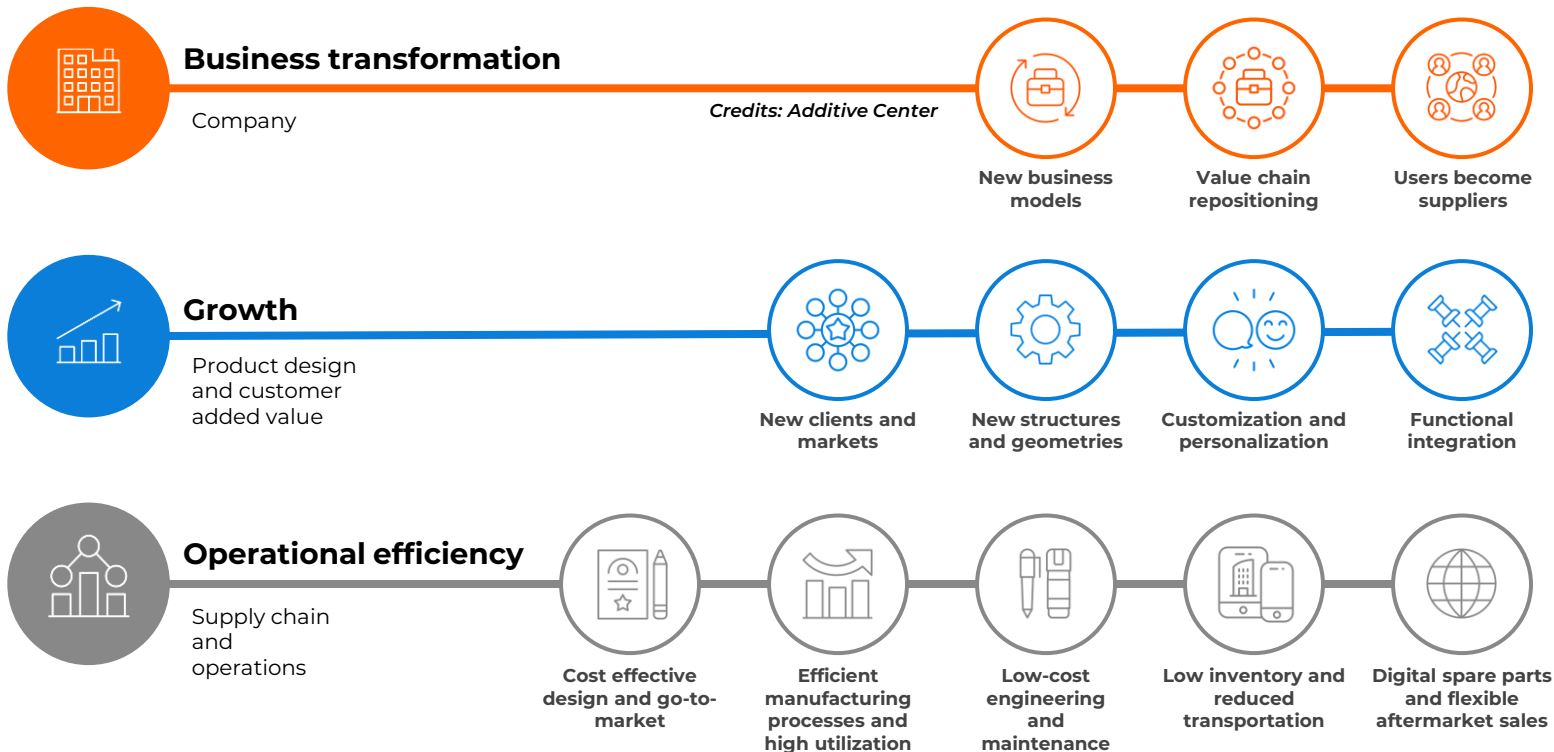

Consumer products - Mouthguards for sports

Customer: 3Dmouthguard

Transforming businesses

Identify Opportunities

Our extensive expertise on additive manufacturing enables our team to quickly identify **profitable** opportunities within your organization.

Engineering Service

We pair material and technology to best fit your requirements. To ensure reliability we have a set of enhanced design and simulation workflows to guarantee quality.

Part Manufacturing

Our qualified global network produces components, no matter the scale required. Without set up cost, on demand and scalable. From 1 to 1000s.

Quality Control

One of our top priorities is implementing Additive Manufacturing solutions with industry grade quality.

ISO 92520

Data analysis & workflow

Digital analysis of supply chain data for optimizing its workflow, recognize potential parts for AM and optimizing the supply chain.

Achievements 2022

165

Applications developed

250+

Engineers trained

€1.760.000

Cost savings realised

AMcubator

Forming an AM ecosystem with industry leaders to accelerate 3D printed applications industry wide.

An international campus development in the heart of Brainport Eindhoven. Top-technology, education, authorities and high-quality facilities are united under a single roof. Brainport Industries Campus is where the innovation and competitive strength of the high-tech manufacturing industry grows wings.
